1 Online documentation conventions.

This section outline the conventions used for writing these documents.

1.1 Shell commands:

Issued commands should be wrapped by `<pre>` and `` tags. The prompt should be `<pre>$` and the command must be run by root, a `#`. Output of commands should be wrapped by `</pre>`.

e.g.

```
<b><pre>$ echo hello world</pre></b>
```

```
<pre>Hello world!</b>
```

gives

```
$ echo Hello world!
```

```
Hello world!
```

1.2 External links

These should be enclosed in square brackets, with the full URL as the link text.

e.g.

```
[<a
```

```
href="http://www.freebsd.org/news/newsflash.html">http://www.freebsd.org/news/new
```

gives

[\[http://www.freebsd.org/news/newsflash.html\]](http://www.freebsd.org/news/newsflash.html)
